

In this country we frown on monopolization and break up such organizations as AT&T, Standard Oil, etc. The NAB wants to limit the content that XM Radio can transmit, but wouldn't that essentially allow the NAB to have a monopoly over what we, United States Citizens, listen to. There are many people who have XM Radio and Many who do not. XM is a subscription service that will attract many listeners, but not every single U.S. citizen. This is due to obvious reasons such as the subscription fee, buying the equipment, etc. The NAB should feel vindicated that their services reach many more listeners than XM ever will and should stop wasting their time and money on this issue. I am a loyal XM subscriber and do not want to pay anymore for my listening pleasure due to the NAB's zeal for spending our tax dollars. NAB, Stop clogging up the system with your B.S.!

Thank you...
